

Components and patterns of worldwide consumption, Worldwide Trade

Along with the slowdown in the growth rate of trade that has been observed in recent years, a second phenomenon has been recorded that concerns the "qualities" of the products traded rather than the quantities involved, and which has amplified the effects of that slowdown.

Components and patterns of worldwide consumption, Regional Patterns

The western European Union (previously EU15) and the countries of North America (USA and Canada) make up the historic basis of worldwide consumption, although other regions now record much faster annual growth rates.

Components and patterns of worldwide consumption, Per capita consumption

Beyond the evolution of consumption in each region, demographic and individual consumption factors combine to accelerate or, on the contrary, slow down the development of consumption.
