

Tomato Foundation Sample Study Fund: ALMOST THERE!

The Tomato Foundation is happy to announce it has almost reached its target fund of 160,000€ to begin the tomato paste and products sample study, which is the next essential step towards their goal of achieving a health claim for tomato products and improved blood flow.

Results of the ongoing Tom'ability projects

Since 2015, researchers in France have been carrying out several recurrent projects (Tom'ability projects) focusing on the integration of the agricultural upstream and the industrial downstream sectors as well as on the management of quality issues in the production of tomatoes.
