Italy: Casalasco experiments with organic control techniques against red spider mites

On 12 June, agronomists from the Consorzio Casalasco del Pomodoro, assisted by the Bioplanet company (Cesena, FC), which breeds insects and mites used as a control method in organic agriculture, by technicians of the various companies (Buoli Attilio snc and Aermatica3D) that supplied the drone and the relevant equipment, and by Marco Zambelli, external consultant, launched an experiment for controlling and progressively eliminating the population of red spider mites.
