

## Navatta: a reference for tomato processing equipment

Since its foundation in 1983 and beginnings as a preferred sub-supplier of single machines and systems for all the big food equipment brands of Parma and Italy, Navatta has developed its own know-how and manufacturing expertise in the sector of fresh tomatoes processing, from factory reception to unloading and sorting, with a reputation for excellent integration of its equipment in tomato peeling, dicing and crushing processes.

## Worldwide water scarcity by 2040

The seasons go by one after another, each with its share of climatic incidents, rarely beneficial for crops, most often harmful – sometimes downright catastrophic – and always impossible to predict.
