

COMPREENDER

Robotic Aseptic Filler by IFT

IFT, one of the Italian leader in tomato processing equipment, has combined two very distant worlds in an innovative machine by taking an aseptic bag filling head, widely used in the food industries, and a robotic arm from automotive assembly lines.

Biodegradable plastics: agricultural practices, life-cycle and regulatory framework (1)

Opinion trends and political decisions taken in favor of limiting chemical inputs (fertilizers, pesticides, etc.), particularly in Europe, have had a positive impact on the use of agricultural plastics, in addition to drastically (and sometimes problematically) reducing the number of substances available for agriculture.

Biodegradable plastics: agricultural practices, life-cycle and regulatory framework (2)

Impact on yield: In a report entitled "Effects of biodegradable mulch on weed control" in 2010, Anzalone et al in Zaragoza reported a statistically significant difference in three-year field trials (2005/2008) of +216% (based on 35.5 mT/ha for bare soil) and 290% (95.2 mT/ha for mulched plants).
