

## The CropScope agricultural ICT platform

Kagome and NEC today announced the enhancement of CropScope, its agricultural ICT platform, which Kagome has been operating jointly with NEC Co, Ltd. since April 2020. New functions to improve farming have been added to the strengthened platform, and stable yields have already been achieved through verification in a variety of environments. As a result, Kagome expects to expand the number of new contracts for the platform, and to contribute to the achievement of more sustainable farming by resolving challenging farming issues.
